"Makes Cooking Easy"

## Saves One Half Your Time In Cooking

The Gold Medal Glenwood doubles cooking capacity, and promotes cooking efficiency to the highest degree.

There are two separate ovens—one for coal and one for gas. Both ovens may be used at one time—or either may be used singly. In addition to the two baking ovens, there is a gas broiler oven. There is room on the coal and gas sections, at the top, for NINE large utensils.

While bread is being baked in the coal oven, pastry may be baked in the gas oven, meat may be broiled in the broiling oven, and cereals and vegetables may be cooked on the top.

Where did you ever hear of greater capacity?

The Gold Medal Glenwood is efficient every day in the year. In the Winter, the coal section not only looks after the cooking, but it helps warm the kitchen. In the Summer, the gas section takes care of the cooking and keeps the kitchen cool.

Call and See Them and you will understand at once why a Glenwood Range "Makes Cooking Easy."
